Indicators

Data Sources

Research

This web site contains latest information and analysis on domestic prices of basic foods mainly in developing countries, complementing FAO analysis on international markets. It provides early warning on high food prices at country level that may negatively affect food security. All the data used in the analysis can be found in the [FPMA Tool](#).

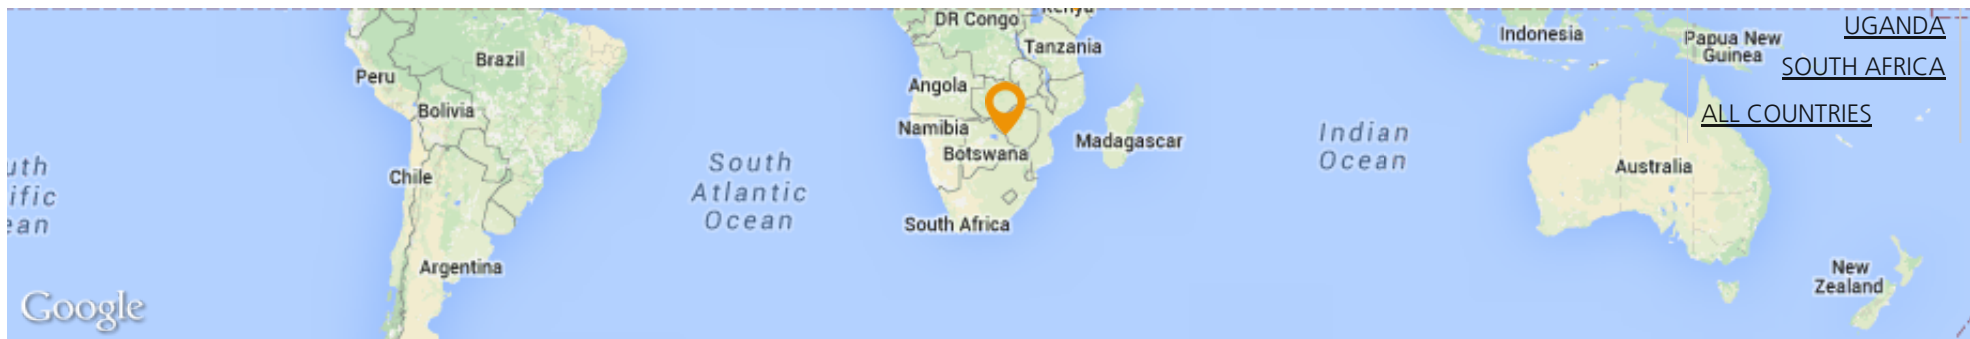

[more](#)

- Maize prices increased sharply in the first two weeks of July underpinned by concerns about prospects of the 2015 main season harvest due to dry weather associ

## DOMESTIC PRICE WARNINGS

Countries where prices of one or more basic food commodity are at abnormal high levels in main markets (identified by the [Indicator of Price Anomalies](#)), which could negatively impact access to food at national level

Price warning level: ● High ● Moderate [Based on GIEWS analysis]
